SKILLS

Languages
- Java
- PHP (Laravel,CodeIgniter)
- JavaScript
- TypeScript
- Node.js
- Python (used in ML/AI)
- R (used in statistical analysis and ML)
- SQL

Backend Libraries/ Frameworks
- Laravel
- CodeIgniter
- Bootstrap
- Spring Boot
- Spring Security
- React
- React Native
- Hibernate
- Tailwind CSS
- Express JS

Report Generations
- Jasper Report

Software Architecture
- Microservice Architecture
- Layered Architecture
- RESTful API Design

Databases
- MySQL
- PostgreSQL
- MongoDB

DevOps & Messaging
- GitHub
- Bitbucket
- Apache Tomcat
- AWS
- Kubernetes
- Jenkins

Tools
- PhpStorm
- IntelliJ IDEA
- Android Studio
- Webstorm
- PyCharm
- VSCode
- Workbench
- DBeaver
- SQL log
- Git
- Postman
- QGIS
- FileZilla
- Jupyter/Kaggle/Colab Notebook
- Figma
- WinSCP

PROFILE

Motivated Full Stack Software Developer with 1.8 years of experience (progressing from Intern to Associate Software Engineer) in designing and deploying scalable systems. Demonstrated exceptional adaptability by rapidly mastering PHP (Laravel/CodeIgniter) from a Java foundation to immediately contribute to full-stack projects (forms, reports, database handling). Possesses core skills in Java/Spring Boot, React/React Native, and Typescript. Experience includes taking ownership of projects, direct customer interaction for requirements gathering, and specialized integrations like processing fingerprint machine data for automated attendance. Proficient in deployment with AWS (EC2, RDS) and tools like utilizing both Microservice and Layered Architectures.

PROFESSIONAL EXPERIENCE

(ERP Lanka (Pvt) Ltd) (RESIGNED DUE TO THE FINALSEMESTER OF THE DEGREE)

Full Stack Software Developer (04/2025 - 06/2025)

- Rapidly adapted to the tech stack, mastering the CodeIgniter framework to develop and maintain ERP Management System Web Application using using PHP(CodeIgniter).
- Specialized Automation: Implemented critical business features like creating a Sales Dashboard to display all accounts and associated count data, and setting up automated PDF generation and delivery (invoices/receipts) to customers via email and WhatsApp. Utilized DBeaver, VS Code, and FileZilla for development and deployment.

(Somro BPO Services (Pvt) Ltd) (10/2023 - 04/2025)

Associate Software Engineer

- Led full-stack development using PHP Laravel for three core enterprise systems: HRM & Payroll, Academic Institution Management, and Grievances Information Management.
- Implemented Specialized Automation: Processed fingerprint machine data via API for attendance/overtime tracking forms. Developed a Grievance Management dashboard with filtered data and counts.

Trainee Software Engineer

- Led the full-stack development and enhancement of core systems, including the Human Resource Management & Payroll System and the Academic Institution Management System.
- Handled the entire feature lifecycle from design to deployment, including form design, front-end and back-end coding, and developing robust reporting features that generated data in various formats (PDF, Excel, Word).

Intern Software Engineer

- Contributed to the development of the Human Resource Management & Payroll System Web Application.
- Successfully undertook the significant challenge of rapidly studying PHP (Laravel) during the internship, quickly transitioning to full-stack contributions by designing new forms, performing front-end development, and implementing back-end logic (Laravel).

FEATURED PROJECTS

ERP Management System Web Application using PHP (CodeIgniter) (ERP Lanka (Pvt) Ltd)

- Tech Stack:
- PHP | CodeIgniter 3 | MySQL | Bootstrap | JavaScript | HTML | CSS | jQuery

Human Resource Management & Payroll System Web Application using PHP (Laravel) (Somro BPO Services (Pvt) Ltd)

- Tech Stack:
- PHP (Laravel) | Bootstrap | CSS | HTML | JavaScript | MYSQL

EDUCATION

BSc(Hons) Software Engineering

Cardiff Metropolitan University (via ICBT Campus)

2026

Graduate Diploma in Software Engineering (GDSE)

Institute of Software Engineering (IJSE), Panadura

2024

G.C.E. Ordinary Level Examination

C.W.W Kannangara Central College Mathugama

2020

CERTIFICATES

British Way English Academy
Aazon Q Developer Fundamentals, AWS Certification

Academic Institution Management System Web Application using PHP (Laravel) (Somro BPO Services (Pvt) Ltd)

- Tech Stack:
- PHP (Laravel) | Bootstrap | CSS | HTML | JavaScript | MYSQL

Grievances Information Management System Web Application using PHP (Laravel) (Somro BPO Services (Pvt) Ltd)

- Tech Stack:
- PHP (Laravel) | Bootstrap | CSS | HTML | JavaScript | MYSQL

PERSONAL PROJECTS / RESEARCHES

AI-Powered Sinhala Voice-Based Multimodal Learning Assistant App for Students (Final degree research project)

- Developed a full-stack mobile learning assistant using React Native for the front-end, and a Node.js/Express.js API with MySQL for the back-end.
- The application integrates advanced AI/ML with three fine-tuned models: a CNN-based OCR model for handwritten Sinhala text, a Transformer-based STT model for spoken Sinhala, and a Tacotron-based TTS model for natural-sounding voice output.
- https://github.com/Sewmini2004/AI-Powered-Sinhala-Voice-Based-Multimodal-Learning-Assistant-App-for-Students
- https://github.com/Sewmini2004/AI-Powered-Sinhala-Voice-Based-Multimodal-Learning-Assistant-App-for-Students_Backend

Construction Web Application

- Developed a full-stack web application for the construction industry using React for the front-end and PHP (Laravel) with MySQL for the back-end.
- The project showcases skills in modern web development and is fully managed using Git, with the source code available on GitHub: https://github.com/Sewmini2004/Construction_WebSite.

POS System Using PHP CodeIgniter

- Built a Point-of-Sale (POS) system utilizing the PHP CodeIgniter framework, MySQL, and front-end technologies including Bootstrap, JavaScript, JQuery, HTML, and CSS.
- The project demonstrates skills in structured PHP development and is available at: https://github.com/Sewmini2004/POS_System_Using_PHP_Codeigniter.

Hospital Management Website Web Application

- Developed a modern full-stack application using React, Typescript, and Tailwind CSS for the front-end, with a Java 17 (Spring Boot/Express) API, MongoDB, and JWT for security.
- Source code for the complete system is available on GitHub: https://github.com/Sewmini2004/hospital-management-system.

Travel Management Website Web Application (Microservice Architecture)

- A multi-module project implemented using Microservice Architecture and Maven with a robust backend stack: Java 17, Spring Boot 3, Spring Cloud, Spring Security (JWT), MySQL, MongoDB, and Hibernate.
- The system uses HTML5, CSS3, Bootstrap, and JavaScript (JQuery) for the front-end, with separate repositories for the API and Front-end components. GitHub https://github.com/Sewmini2004/Travel_Management_System_API and https://github.com/Sewmini2004/Travel_Management_System_Frontend

Bank Management System (Layered Architecture)

- A standalone application built using Java 8 and following a Layered Architecture with JDBC for interaction with MySQL.
- Features include reporting via Jasper Reports and a user interface developed with JavaFX (JFoenix), CSS, and FontAwesome. GitHUb : https://github.com/Sewmini2004/BankManagementSystemLayered

Hostel Management System (Standalone)

- Developed a standalone management application using Java 11, Hibernate Native for persistence with MySQL, and integrated Jasper Reports for data visualization.
- The graphical user interface was built using JavaFX (JFoenix) and CSS.

- I hereby declare that the above information are true & accurate by my knowledge and belief.
